描述
检查报告回传后，科室小结生成时，结论没有进行分割

The screenshot shows a medical system interface for a patient named 李海玲. It displays a list of examination results on the left and an '异常汇总' (Abnormal Summary) on the right. The '异常汇总' section lists four items: 1. 慢性咽炎 (Chronic Pharyngitis), 2. 牙结石 (Dental Calculus), 3. 血清总胆固醇升高 (Elevated Serum Total Cholesterol), and 4. 符合绝经后子宫改变... (Consistent with postmenopausal uterine changes...). The fourth item is expanded to show a detailed report. In this report, the '小结' (Summary) section contains the text '符合绝经后子宫改变 宫颈囊肿'. A red box highlights this text in the report, and another red box highlights the same text in the '异常汇总' list. A red note '实际有回车' (Actually has a carriage return) is placed next to the first red box, indicating that the text in the report should contain a line break but it does not.

历史记录
